

What is **Micromedex**?

For over 50 years, Micromedex has stood out as one of the largest and most trusted online databases for information on medications, toxicology, diseases, patient education, and alternative medicine.

Micromedex facilitates analysis and decision-making in areas such as pharmacological information, drug handling, medical conditions, toxicology, and alternative therapies.

Additionally, it answers specific questions, such as intravenous compatibility, drug interactions, and dosage calculation tools.

Evidence-based information available in Micromedex includes:

- Guidelines, dosages, and recommendations for FDA-approved drugs, as well as selected options from EMA and Health Canada.
- Details on drug interactions and intravenous (IV) compatibility.
- Treatment protocols and checklists for treatment of serious and chronic diseases.
- Information that helps in choosing appropriate tests and interpreting results.
- Data about alternative medicine, including therapies and other plant-based alternative approaches.
- Specific information for neonatal and paediatric medicinal products, considering age groups and indications.
- Detailed protocols for toxicology and exposure management.

Why is Micromedex essential?

It is an indispensable tool to support safe and effective therapeutic decisions at the point of care or consultation. With its solid evidence base, the platform plays a crucial role in reducing medication errors and improving patient outcomes.

Benefits of Meraeve Micromedex:

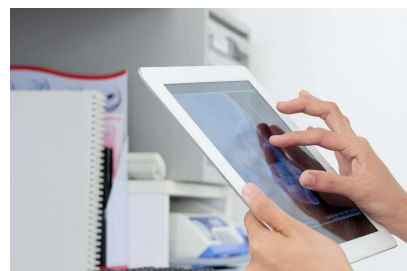

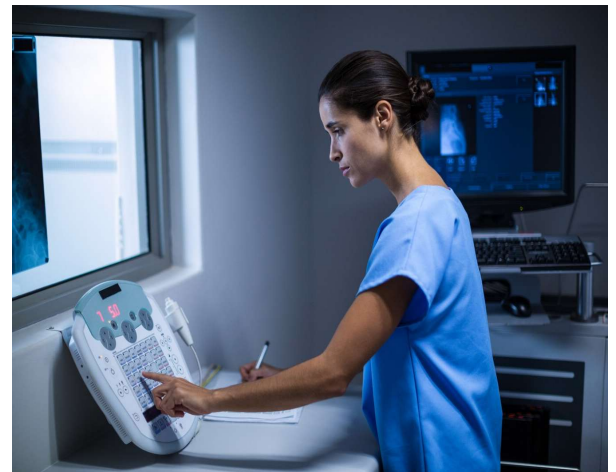

- Reduction of medication errors and support for patient safety.
- Provision of evidence - based ratings and recommendations to support clinical decisions.
- Guidance on off-label use decisions with support in comprehensive and cited data.

What is DynaMedex®?

DynaMedex is a platform that combines the capabilities of DynaMed and Micromedex Assistant, offering comprehensive information on diagnosis, disease treatment, and medications.

This integrated solution supports physicians in their practice anytime and anywhere, through multiple channels such as the web, mobile devices, and integrated healthcare systems.

It facilitates decision - making based on scientific evidence from DynaMedex, following a rigorous editorial process by organizations such as NICE and CMS.

What is Micromedex® ISI?

It is an innovative solution that offers an alert system and content based on scientific evidence, with integration with health information systems.

This integration is carried out through APIs and InfoButtons, allowing healthcare professionals to have direct access to relevant information in their workflow.

Key Features and Contents of Micromedex® ISI:

- Contraindications and precautions: Related to specific diseases.
- Maximum dose recommendations.
- Adverse reactions and drug allergy alerts.
- Alerts on duplicate agents.
- General precautions: Based on patient's age and gender.
- Alerts related to pregnancy and breastfeeding.
- Injectable drug compatibility: Specific alert system.
- Detailed summaries of pharmacological information.
- Educational content for patients.
